// Profile

Fourth-year Computer Engineering student with hands-on experience in web development projects and teamwork. I like turning a vague idea into a working feature and explaining it clearly to people who do not code. Available for a five-month traineeship starting in September, in a team where I can contribute to real code and learn from code reviews. English B2.

// Education

BSc in Computer Engineering 2022 – 2026 (expected)
Universidad Ejemplo, Spain

- > Relevant courses: Databases, Web Programming, Software Engineering, Operating Systems.
- > Final-year project (in progress): web app for managing university equipment loans.

English B2 (upper-intermediate) · Language academy example 2024

// Projects

Library app (team of 4) · University course project 2025

- > Built the booking module in JavaScript with a SQL database; presented the project to 40 classmates.
- > Wrote 25 automated tests and documented the API for the rest of the team.

JavaScript SQL Git

Weather dashboard · Personal project 2025

- > Small web page that reads a public weather API and charts the next five days; published on a free hosting service.

JavaScript REST API

// Other experience

Student representative · School of Computer Engineering 2024 – 2025

- > Spokesperson for a group of 55 students and organiser of a welcome day for first-year students.
- > Collected suggestions every month and presented them to the degree coordinator.
